Parking

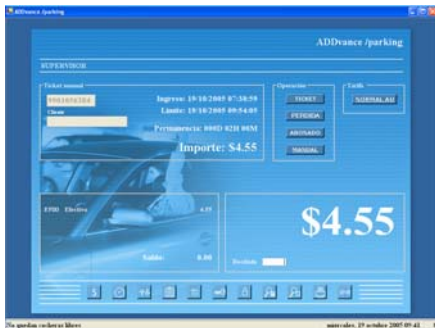

# Kwarp Park

THE PARKING SOLUTION YOU WERE LOOKING FOR WITH THE ROBUST ENGINE OF THE SQL DATABASE

*The automated parking control is an essential tool for the management of modern companies*

## Till / POS

- With an interesting versatility concerning the operator's management of consultations needed to offer the client an immediate response. Fast and easy response whether it's a consultation regarding a ticket or monthly payment.
- Easy till management with in-

crease or decrease, partial withdrawal.

- Shift closure, till block and collection search based on types of payment.
- The till operator can collect monthly payments or configure the system to charge and print the fiscal

ticket.

## Automatización Diseño y Desarrollo

Has been offering specialized high-end solutions to companies for over 15 years.

# Administrative - Back office

*Versatile tool for the efficient management of parking*

- Designed for the quick and easy management of monthly clients
- The system is designed to be able to charge monthly payments with a credit card
- Manage the information online, i.e. send and receive information, updates on client information, tariffs, etc.
- It has all the necessary lists to control parking collections and control access of users
- Easy management of updates of VAT charges and tariff changes
- User login, creation and modification of entries

## CONTROL OF PERIPHERALS

- Designed as a service (PC does not need to be logged on)
- Log of the access of peripheral events.

## REMOTE SUPERVISION

- Remote management entrance and exit incorporated through Ethernet.
